

Democratizing Automation

Agenda

Ui Path

Reboot Work.[™]

Hyperautomation Build Phase- Low Code | No Code

StudioX overview and deepdive

Studio Pro overview and deepdive

Studio 20.4 overview and deep dive

Foster RPA adoption

Your scaling opportunity with the help of individually-created automations to drive bigger revenue and cost savings from RPA

Gartner Predicts 2020:

By 2023, there will be a 30% increase in the use of RPA for front-office functions (sales and customer experience)

\$ Value per Single Process

You're hyperautomation-ready with the UiPath Platform

| | Discover | Build | Manage | Run | Engage | Measure |

Improved UI Automation

Better automation of any UI interface, basing the result on multiple complementary methods for improved accuracy

Governance

Ensure common best practices and code conventions around building scalable automation for all types of users

Developer Productivity

Faster performance and an improved command palette to speed development time

Source Control

Ensure that teams can continue developing new automation together, while keeping complete control over their work

Q

What is StudioX?

Simplified version of Studio to rapidly automate without the need for developer resources or coding — making automation accessible to all.

Aim to automate Day-to-Day Simple Tasks

- Simplified User Experience
- Focused on Excel & Outlook

Build and Run your own Automation

Bottom-up Automation First Approach

...we are bringing automation to the masses, putting the employees in the driver seats of automation initiatives.

StudioX Platform

Mainly dedicated to non-technical personas

What does StudioX bring?

- Delivered as a profile in UiPath Studio
- Includes an attended Robot
- Straightforward business tasks automation
- Seamless Office integration
- Simplified interface for easy access to features

Let's see how **StudioX** works

Studio X Use Cases

| W | X | 0 | PDF | | |
|--|---|---|---|---|---|
| Using it as a starting template, Save as a new file (could be Word or PDF), and then "pass along" Extracting information from a Word doc and move it into another system Comparing the differences between files | Taking large spreadsheets generated by a system and splitting them into multiple sheets based on specific data types Taking data from spreadsheets and entering it into another system Extracting data from another system and using it to create a spreadsheet Merging several spreadsheets into a different system | Process emails that fit a certain criteria (e.g. emails arrive with specific attachments and they process the contents of those attachments) Send a file created by the automation via email Status update/ communication that includes the results of an automation workflow | Using it as a starting template, Save as a new file, and then "pass along" Extracting information from a PDF document move it into another system (e.g. pull out lines in an invoice and enter it into an expense tracker). Comparing the differences between files | Work with the Windows file system Download files from the web browser and open the recently downloaded file. Upload files through a web browser | Entering data into desktop and web applications Getting data from desktop and web applications Moving data between web applications and desktop application |

Introducing Studio Pro

New Premium Studio SKU

Adds new testing capabilities including

RPA Testing

API Automation

Mobile Automation

SAP Testing

Data-Driven Testing

A key component of a larger Test Suite

UiPath Test Suite is a new bundled solution that allows RPA and Application Test teams to more rapidly create resilient automations in Studio Pro and improve collaboration and alignment between the business and development using Test Manager.

UiPath Test Suite: StudioPro for RPA Testing

Build Resilient Enterprise E2E Automations
