

It's Time to Hyperautomate

Discover – AI Enabled

August 27, 2020

© 2005–2020 UiPath. All rights reserved.

Agenda

- 01** HyperAutomation Suite
- 02** Process Mining Overview and Deepdive into core feature of 20.4
- 03** Task Mining Overview and Deepdive
- 04** QnA

You're hyperautomation-ready with the **UiPath Platform**

Discover

Discover what to automate with process mining powered by AI

Build

RPA developers, citizen developers, and employees create automations

Manage

Manage your digital robots from anywhere, securely at any scale

Run

Robots work with your applications to carry out automations

Engage

Robots collaborate with people to automate complete processes

Measure

Embedded analytics give you deep insights into robot *and* business metrics

Automation Hub

Apps
Chatbots

Insights

* Process Analysts

* RPA & Citizen Developers

* IT Operations

* Business Users

* Business Analysts

Facts and assumptions

The "textbook" process

20%

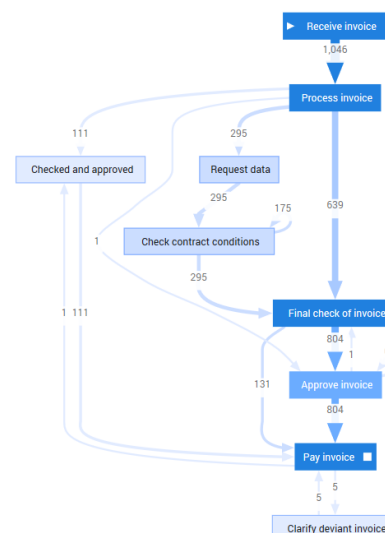

The different process **variants** in which the **most common** process is visualized first.

What people think

40%

See less common paths and activities. Ideally suited to detect **anomalies** and inefficient process variants.

The reality

100% data coverage. No activity escapes the eye! You can zoom in detecting long-term or **unusual process paths** or defects that would otherwise remain hidden.

The Planning Approach

Discover

Automation Hub

Crowdsource ideas from
your employees

Task Capture

Automatically capture and document
processes as you work

Task Mining

Analyze the work people do to
**find everyday, repetitive
tasks to automate**

Process Mining

Analyze data from your line of
business applications to
continuously **understand and
optimize end-to-end processes**

Process Understanding

Understand your as-is processes and scientifically uncover your next automation opportunity

Insights

Introducing...

Process Mining

Accelerate RPA and optimize your processes **holistically**

Take charge of your processes with
UiPath Process Mining

Leverage existing digital footprints

Access process data from systems and applications like SAP, Oracle, Salesforce and ServiceNow

Make data meaningful through business logic

Add Tags and KPI's to data to align outcomes with your strategic business goals

Use insightful visualizations to find automation opportunities with the biggest impact

Obtain a fact-based representation of complex processes, showing all bottlenecks, deviations and inefficiencies

Systems store this information in **databases** and **logfiles**

Event

Timestamp

Case ID

How does it work?

1

Connect Data

Access IT system data from applications, databases, flat files

2

Configure

Translate your business outcomes into process KPIs and tags

3

Get the insights

Analyze and monitor your process to get actionable insights

4

Act On Facts

Automate the processes with the highest ROI-potential to reach your KPIs

Process Mining – **New!**

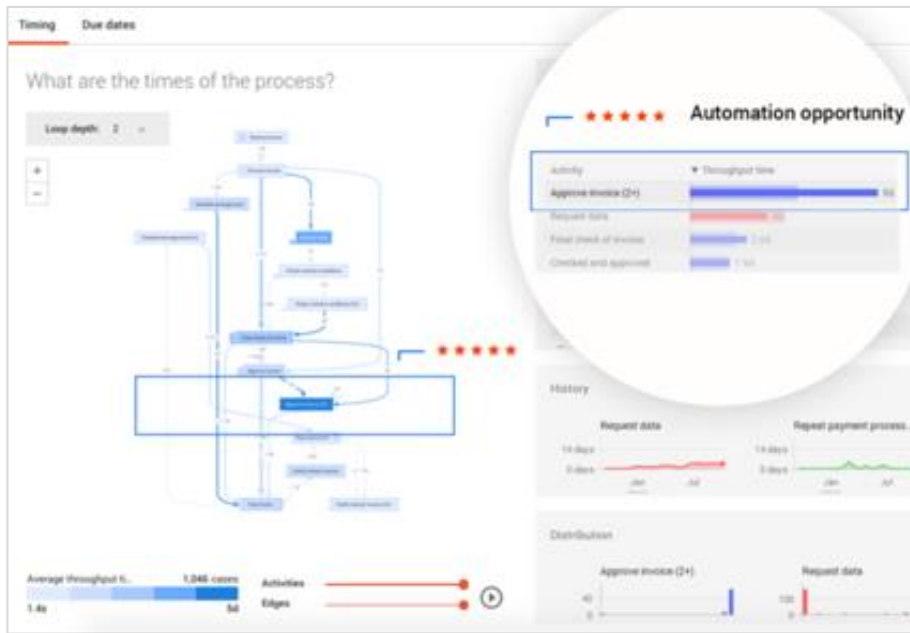

UiPath Branding making UiPath Process Mining (formerly ProcessGold) a true member of the UiPath product family

Localization providing the option to deploy in multiple languages

Compare Process change over time, for instance, to see the impact of implementing a new automation

Process Mining – Roadmap!

- Collapsible charts
- Actionable insights
- Native SAP extraction
- Scalability & performance
- New charts
- Improved connectors
 - SAP Purchase-to-pay
 - SAP Accounts Payable
 - SAP Order-to-cash
 - SAP Accounts Receivable

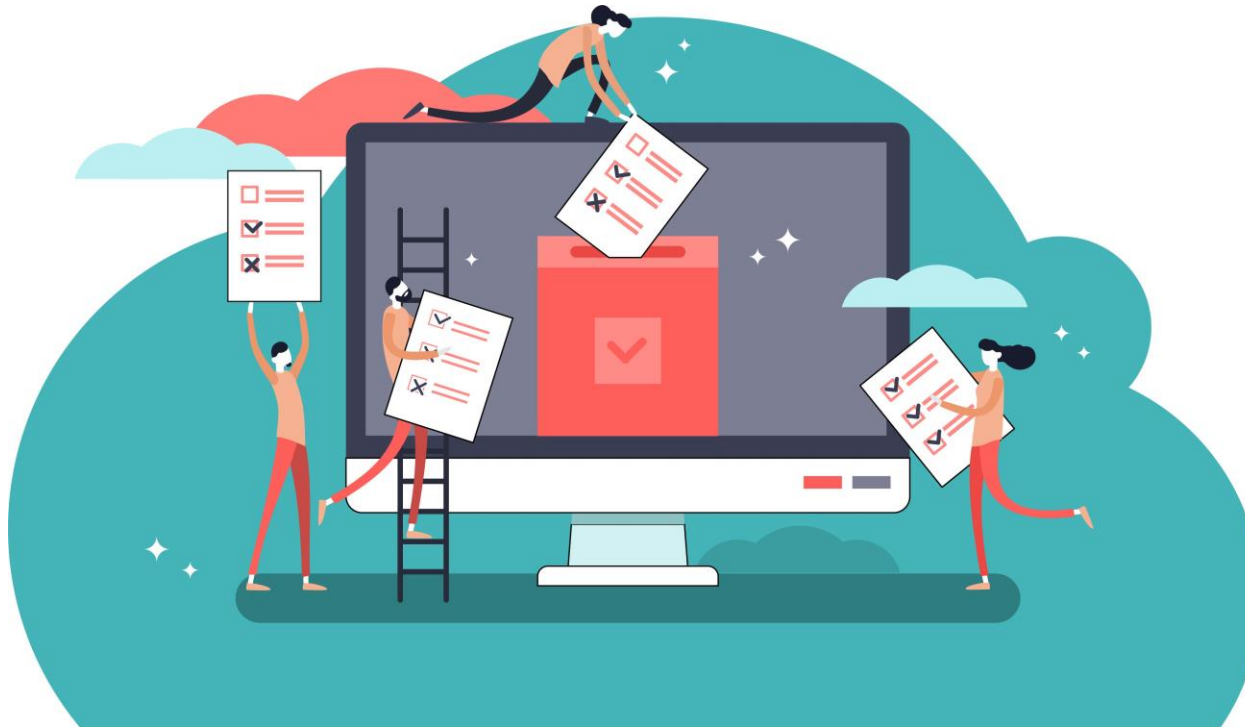

Process Mining Demo

Introducing...

Task Mining

Discover automation opportunities for immediate impact

UiPath™

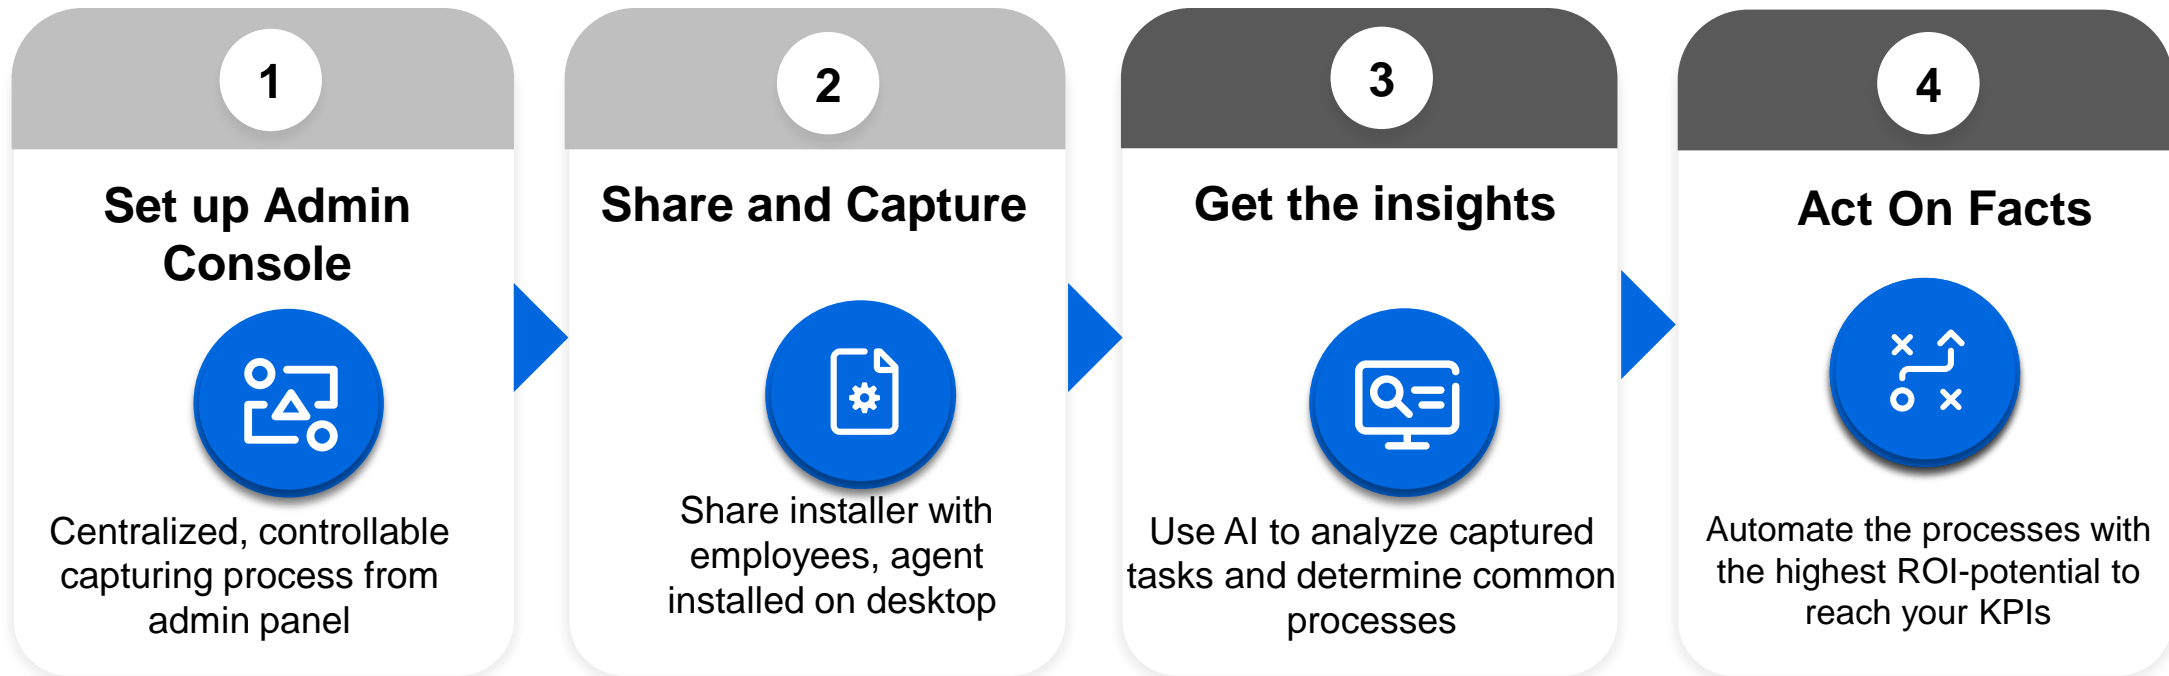

Ui Task Mining

Analyze how people get work done with **UiPath Task Mining**

The most effective way to **discover** and **prioritize** easy-to-automate, repetitive tasks with fast ROI

How does it work?

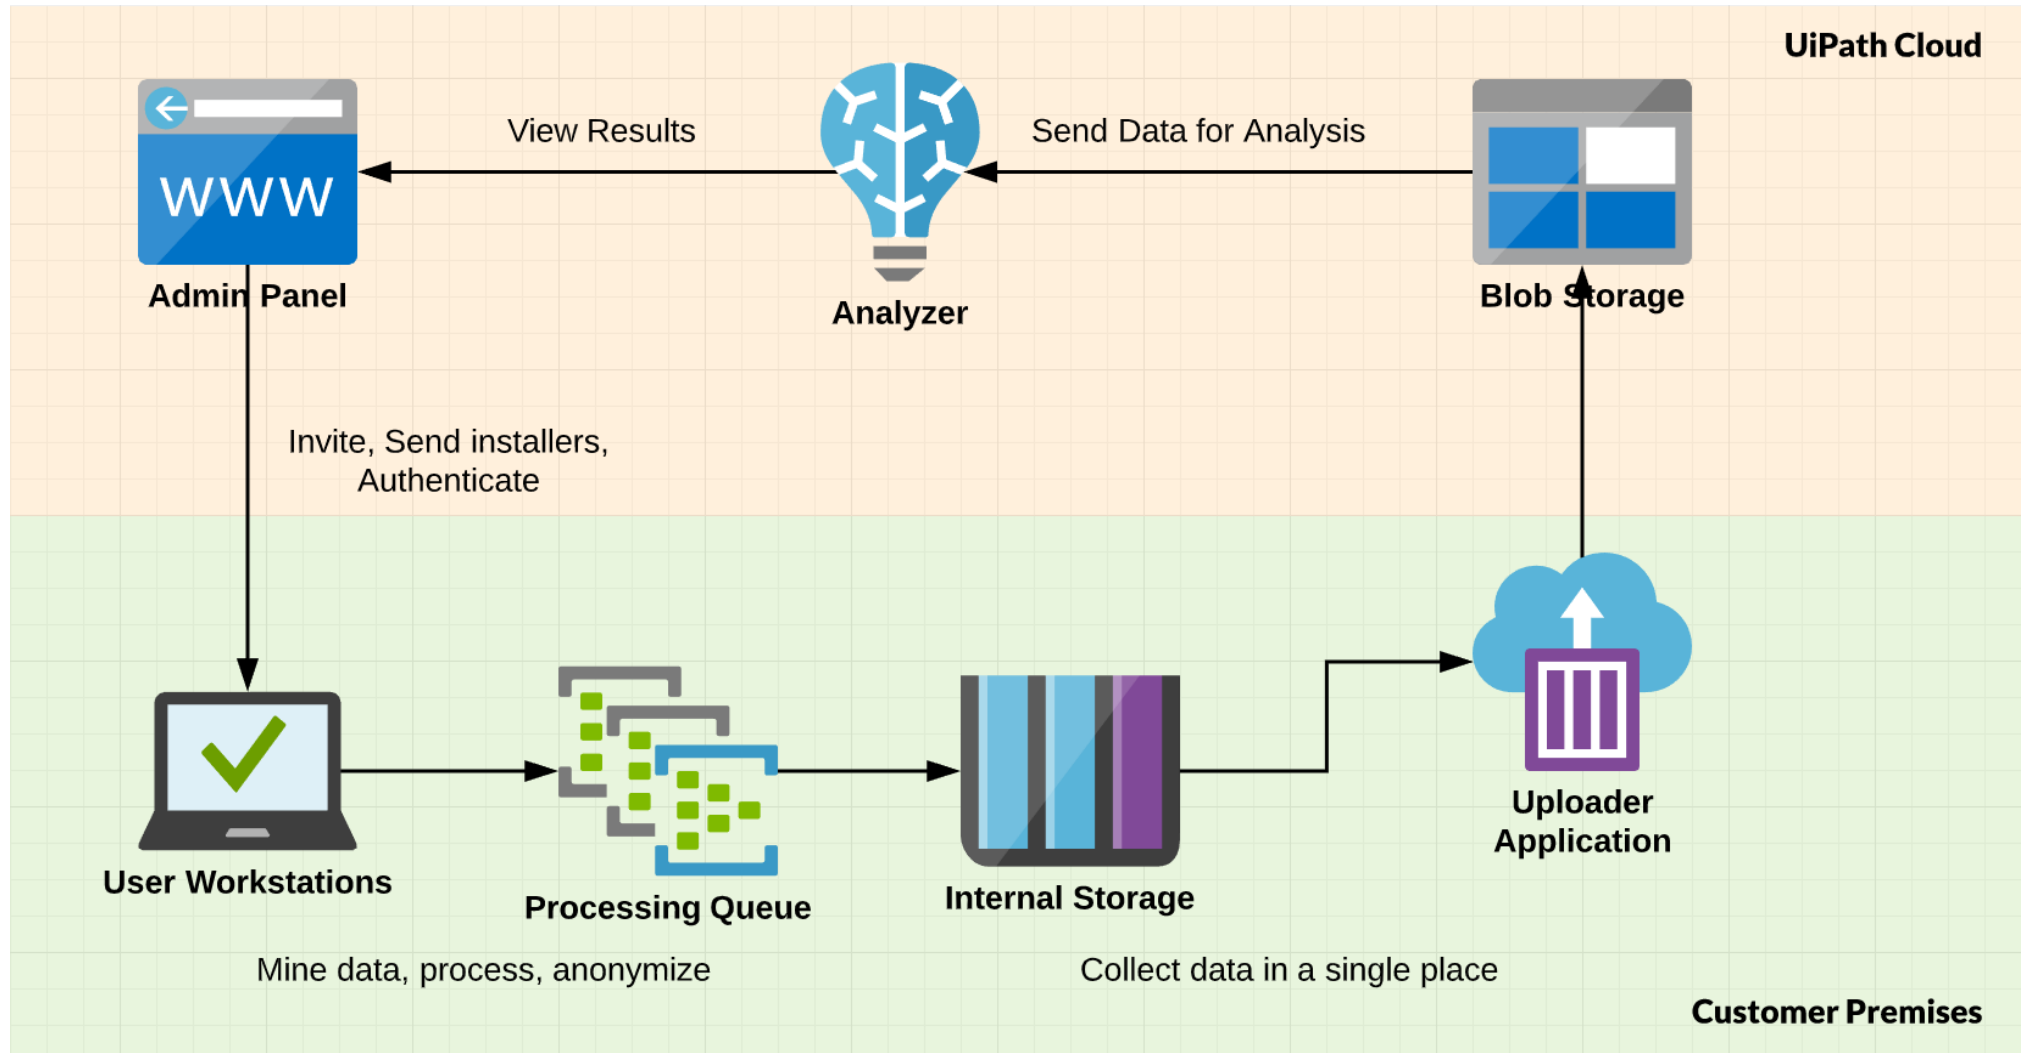

First, **discover** automation opportunities for immediate impact

Export **PDDs or XAML** to give RPA developers a headstart
